

## Type sheet

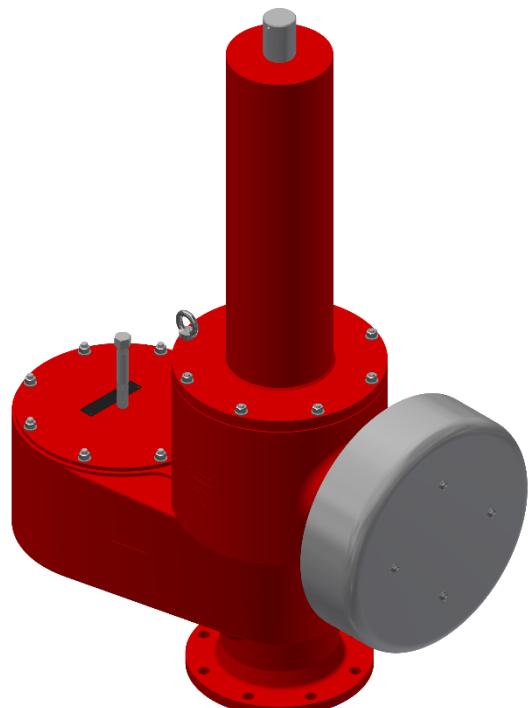

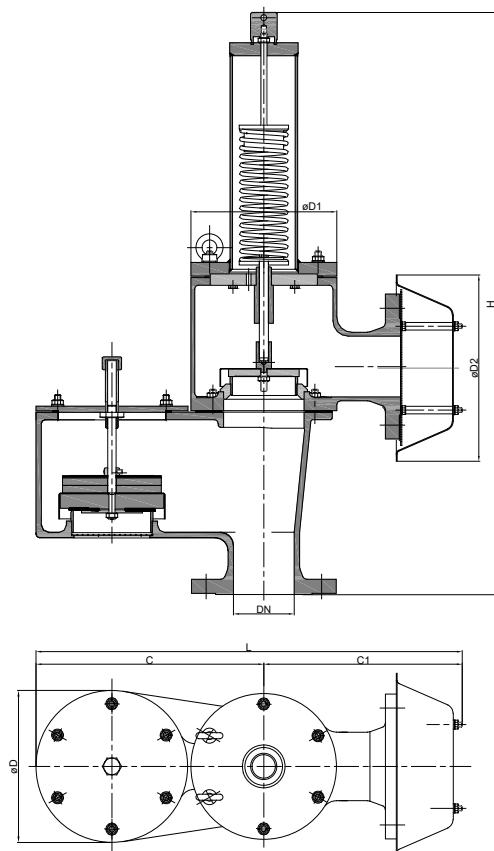

Pressure and vacuum relief valve  
**KITO® VD/oG-PA-... DE**

### Application

**As end-of-line armature, for venting apertures on tank installations.** Used mainly as venting and breather device for fixed roof tanks. Used to prevent inadmissible pressure and vacuum and to minimize unwelcome gas losses or inadmissible emissions respectively. The housing is mounted perpendicularly on a tank roof.

### Dimensions (mm) and settings (mbar)

| DIN       | DN  | ASME | C   | C1  | D   | D1  | D2   | H    | L | kg | setting<br>vacuum | pressure |
|-----------|-----|------|-----|-----|-----|-----|------|------|---|----|-------------------|----------|
| 50 PN 16  | 2"  | 255  | 230 | 165 | 165 | 245 | 604  | 485  |   |    | 2-60              | >60-415  |

**Performance curves**

Flow capacity V based on air of a density  $\rho = 1.29 \text{ kg/m}^3$  at  $T = 273 \text{ K}$  and atmospheric pressure  $p = 1.013 \text{ mbar}$ . For other gases the flow can be approximately calculated by

$$V_{20\%} = V_b \cdot \sqrt{\frac{\rho_b}{1.29}} \quad \text{or} \quad V_b = V_{20\%} \cdot \sqrt{\frac{1.29}{\rho_b}}$$

The indicated flow rates will be reached by an accumulation of 20 % above valve's setting. If the allowable overpressure is less than 20%, please consult the factory for the corrected volume flow.
