Interior separation | Increase cable service life

Previous generation of interior separation with other options ► www.igus.eu/3450 ► www.igus.eu/3480**Standard - for any application**

Separator with a wide base for maximum holding force.

**For even faster installation**

Wide on one side for high holding force, narrow on opposite side for easy cable fitting.

**For small cables**

Separator with a narrow base for a large number of small cables side by side. Saves space.

**For side-mounted applications**

Asymmetrical separator, for defined gap distance. No additional spacers required.

**Locks securely in preset increments**

Notch separator for exact positioning. Recommended for side-mounted applications.

**Horizontal separation**

Full-width shelf locks securely into separators at both ends, giving a fixed width. Can be used as full-width or partial shelf.

Interior separation | To allow faster filling

**Lean separators¹⁾**

For quick fitting of shelves in several layers.

1) Note: Please combine maximum 4 lean separators with one shelf. Not suitable for side-mounted e-chains®!With the lean separator you can quickly insert several layers of cables into the e-chain® and reduce the installation time by up to 50%²⁾.²⁾ Lean interior separation vs. Standard separator - measured on a 4m long e-chain® fitted with 12 cables in the igus® readychain® factoryigus 3D CAD, configurators, service life calculation and more ► www.igus.eu/E2000
