

FOG CANNON HE30T

The HE30T cannon is a perfect unit for smaller job sites lacking the source of the water. It sits on the 1000 l water tank and is able to run for about 5 hours.

APPLICATIONS & INDUSTRIES

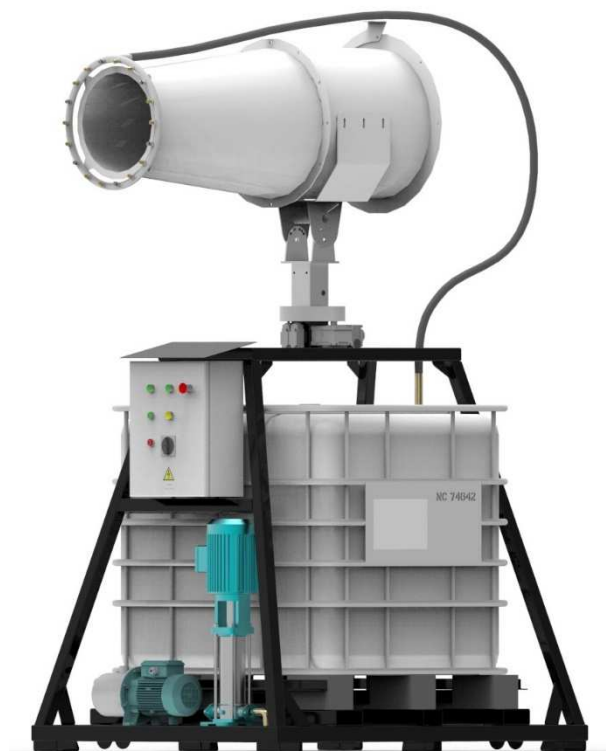

- demolition & construction
- steel & slag
- waste transfer
- recycling & scrap
- wood processing
- material unloading / loading
- odour control

BASIC MODEL INCLUDES

- rear mounted axial fan
- high-efficiency spray nozzles
- booster pump
- self-priming pump
- water filter
- automatic horizontal rotation
- manual tilting
- electric control panel

ADDITIONAL ACCESSORIES

- wireless remote control
- auto vertical tilt
- 60 Hz frequency

TECHNICAL SPECIFICATION	HE30T
Throw (meters)	up to 30 (still conditions)
Droplet size (µm)	50-150
Submersible pump (kW)	1,1
Booster pump (kW)	1,87
Fan (kW)	4,0
Horizontal rotation	0-350°
Adjustable vertical elevation	0-35°
Water consumption (l/h)	216
Nozzles quantity (pcs)	18
Water tank (l)	1000
