

FOG CANNON HE20C THE COVIDFIGHTER

The HE20C „Covidfighter“ has a reversible spraying mode and due to this benefit it is a perfect unit for the disinfection and decontamination purposes.

The first mode enables to produce the mist which is driven up to 20 metres distance – this is used, for example, for the disinfection of streets, sidewalks, roads etc.

In the second mode the cannon creates the curtain which is 6 m in diameter – this mode is used mainly for the decontamination of the public transport means.

MAIN APPLICATIONS

- Decontamination of the public transport means (subway, buses, trams etc.)
- Disinfection of the outdoor public transport platforms
- Decontamination of the subway underground stations
- Tunnels decontamination
- Disinfection of streets, sidewalks, roads etc.

Benefits

- compact and mobile
- small but extremely powerful
- arrives fully assembled
- adjustable water flow

BASIC MODEL INCLUDES

- Head with the reversible spraying mode
- Rear mounted axial fan
- Two stainless steel mist ring
- High-efficiency spray nozzles made of stainless steel
- Central column support to enable horizontal rotation
- Booster pump
- Water filter, pressure gauge
- Electric control panel

| TECHNICAL SPECIFICATION | HE20C |
|-------------------------------|-----------------------------|
| Throw (meters) | up to 20 (still conditions) |
| Droplet size (µm) | 50-150 |
| Booster pump (kW) | 1,5 |
| Fan (kW) | 4,0 |
| Horizontal rotation | -90°/+90° |
| Adjustable vertical elevation | 0-35° |
| Water consumption (l/h) | 3000 |
| Nozzles quantity (pcs) | 36 |
| Power supply | 3 x 400 V AC, 50 Hz |
