

MOBILE FOGGER HE-ORSM

The mobile fogger HE-ORSM combines the powerful fog fan with a large water tank designed for mobility and ease of use. The tank captures and recycles wastewater and can be used in chemical fogging. Centrifugal atomization produces billions of tiny, fog-like particles that quickly evaporate. The fogger uses a float valve to maintain the water level, a submersible pump to feed the fogging head, and ball valve to control the fogging output.

APPLICATIONS

- disinfection and decontamination
- interior humidification
- evaporative cooling
- odor control
- fumigation
- agriculture

BENEFITS

- compact and mobile
- small but extremely powerful
- arrives fully assembled
- adjustable water flow

TECHNICAL SPECIFICATION	HE-ORSM
Throw (windless condition)	up to 10 mts
Main motor	1/3 HP - 4.4 amps 240 V, 50 Hz, 1Ph
Vertical elevation (manual)	0°, 15°, 30°, 45°
Average particle size	5-20 microns
Tank capacity	68 l
Noise	70 dBA (3 m)
Water consumption	2.8-31 l/h
Dimensions	650 x 530 x 1120 mm (L x W x H)
Weight	36.3 kg
