

# Efficiency at its best

High-end heat pumps | EcoTouch 5029 Ai

# EcoTouch 5029 Ai | Power range from 5 – 29 kW

up to  
COP 5.1

A+++ : Space heating energy efficiency class of the package (with WWPR II controller) at W10/W55. Discrepancies within the model series possible.

## High performance with minimal noise emission

The EcoTouch 5029 Ai series with a performance spectrum from 5 to 29 kW is suitable for use in buildings with higher heating demand. At COP values up to 5.1 the compact heat pump is as quiet as a refrigerator.

## Completely high-end

The EcoTouch 5029 Ai not only impresses with its efficiency, but also by its modern design. The innovative control software EasyCon also allows an intuitive and convenient control.

## Space-saving compact heating center

By connecting a water tank from the EcoStock series the EcoTouch 5029 Ai becomes a complete heating system. The footprint of less than 0.38 m<sup>2</sup> is ideal for a space-saving installation.

## Climate control on demand

The EcoTouch 5029 Ai is available in the versions NC for natural cooling with system separation and RC for climate cooling with reversing circuit. Based on your climate-control need the suitable model can be selected.

## Features

- Heat pump for higher capacity
- 4.3 inch colour touch-display
- Integrated web interface for App-control
- Intuitive control software EasyCon
- Central power switch
- Sensor system with numerous sensors
- COP counter and display of all operating data
- Domestic hot water heating available optionally
- Integrated electrical heating element 6 kW
- Chlorine-free refrigerant R410A without ozone depletion
- Speed-controlled circulation pumps of efficiency class A
- Integrated vibration damper Silenter®
- Easy to service unit design
- Connections installed on rear
- Unit dimensions: (W x H x D) 600 x 1470 x 633 mm

## Optional features

- Connection set
- Natural cooling (NC) and reversing circuit (RC)
- Starting current damping (400 V)
- Controller extension for:
  - Second heating circuit e.g. for swimming pool heating
  - Use of thermal solar energy
  - 2 additional mixer circuits

## Highlights

- Low operating costs due to COP values up to 5.1
- Low noise emission of 44 dB (A)
- Power reserves can be used efficiently
- Touch-display with innovative EasyCon software
- Smartphone control via EasyCon Mobile
- Fully integrated into the Internet
- Indication of current COP value
- Housing in high gloss white
- Optimized footprint 0.38 m<sup>2</sup>

# EasyCon Software | The new type of control

## Touch symbols in colour

As the name suggests, EasyCon makes the operation of your heat pump even easier. The software uses simple, self-explanatory symbols like on a Smartphone. The symbols on the colour touch display of the EcoTouch units require only a light touch.

## This is as easy as it gets

The symbols, also referred to as icons, are self-explanatory. You therefore always have quick access to all important functions of the unit. Setting the desired temperature or timer program is child's play. Operating a heating system without the operating manual has never been easier.

## Comprehensive data evaluation

On the large colour display you can evaluate a variety of data. The actual consumption data, performance data and operating states are clearly displayed in graphics. This is made possible by the data acquisition by the sensor system and the mathematical analysis by EasyCon.

## Fully integrated into the Internet

The particularly advanced feature of EasyCon, in addition to the modern user interface, is its easy integration into the network. As a standard, all heat pumps in the EcoTouch series are connected to the network via the touchscreen. The free app EasyCon Mobile allows you to control your heat pump even while you are on the move.

## Features of the control unit

- Touch Display, 4.3"
- Icon orientated user interface that makes it easy to use, configure and monitor
- Control via Smartphone app
- USB Port integrated as standard to permit upgrades and uploading of logged data
- Network Ethernet Port for remote access

## Software

- Modern Control technology
- Efficient automation of heating and cooling
- Additional Control Functions included as standard:
  - Integration of Solar Thermal
  - Integration of Photovoltaics (PV)
  - Second Heating Circuit
  - Three additional Weather Compensated (Mixing Circuits)
- Energy Monitoring included as standard
- Advanced Bivalent control possibilities
- Remote Control via EasyCon mobile app
- Automatic Screen Saver

## Easy to use

- Intuitive EasyCon touch control interface
- System state clear to see
- Touch shortcuts to main system functions
- Dynamic display of refrigerant circuit
- Automatic email failure messages
- Graphical display of temperatures (current and historic)
- Continuous display of energy performance (SPF / COP)
- Individual timer program and vacation mode
- Internet Connection and Web interface included as standard

# EasyCon | Mobile App Control

## Features

- Control and monitoring software for heat pumps living area ventilation, energy storage and homeautomation
- Multilingual full version
- Intuitive menu structure
- Available as Apple and Android app
- Can be installed on smartphones and tablet PCs
- Expandable, e.g. for living area ventilation

## Technical Requirements

- Available LAN network
- Existing Internet access via provider
- Router with a spare RJ45 connection
- WATERKOTTE EcoTouch products
- WATERKOTTE RemoteBox / SmartBox

## Highlights

- Free control software
- Continuous system overview
- Comprehensive display of measured data
- Active system messages from the heat pump

### Quick and convenient via Internet

With the EasyCon App for mobile control you can access to your WATERKOTTE products by smartphone or tablet. This is made possible by an Internet connection that you can establish with your heat pump via the application and a web interface.

### Free of charge and easy to install

EasyCon Mobile is available free of charge as an App- and Android- app for your Smartphone or your tablet computer. Simply download from Internet and install. Then enter your heat pump ID, and you are connected.

### Mobile control of your heat pump

The menu structure of the application for mobile control is like the control software that is installed on your heat pump. This allows immediate and intuitive navigation. With the software you are able to send mobile control commands, or check data evaluations.

### More ease of use and less costs

The EasyCon applications make the mobile control of your WATERKOTTE products possible. This results in real ease of use. By mobile control you can already turn up the heat from the sofa. Saving costs has never been so much fun.
