

Economy Series Electric Actuator

VLAST/VLACT

An electric alternative to pneumatics

Electric Actuator

VLAST/VLACT

Switch from pneumatics to electricity with a simple, energy-efficient, high-performance actuator

VLAST

An all-in-one electric actuator combining an LM Guide, ball screw, and housing

The built-in Linear Motion (LM) Guide eliminates the need for an external guide element.

In comparison with air cylinders, this product also offers higher precision for multi-point positioning when moving between two or more points.

Maximum speed
1000 mm/s

Positioning repeatability
±0.02 mm

VLACT

An electric cylinder with an internal ball screw

In comparison with air cylinders, this product offers higher precision for multi-point positioning when moving between two or more points thanks to using a ball screw as the drive element.

Maximum thrust
895 N

Positioning repeatability
±0.02 mm

A quiet, energy-efficient, eco-friendly electric actuator

THK Technology 1

Cost-effective, simple structure

With an LM Guide directly forming the base, this simple design reduces the number of components.

* VLAST only.

THK Technology 2

Lightweight and compact

This series adopts the Caged Ball LM Guide SRS, which has a compact rail cross-section height that allows for lightweight, space-saving designs.

* VLAST only.

THK Technology 3

Motor compatibility for various applications

Various motors and drivers

The VLA is designed to be compatible with various types of motors. You can employ the type of control you are used to.

Compatible motor manufacturers:
Yaskawa Electric/Mitsubishi Electric/Tamagawa Seiki/Keyence/SANYO Electric/OMRON

THK Technology 4

Long-term maintenance-free operation

Long-term maintenance-free operation has been achieved by the adoption of the Caged Ball LM Guide SRS* and the QZ Lubricator, which supplies the optimal amount of lubricant to the ball screw.

* VLAST only.

The QZ Lubricator feeds the right amount of lubricant to the ball screw shaft raceway.

This allows an oil film to be constantly formed between the balls and the raceway, which improves the lubricity and significantly extends the maintenance interval.

THK Technology 5

Service life calculation

The service life of the LM Guide and ball screw can be calculated based on the usage conditions. Contact THK for details.

Using this product in place of pneumatic devices enables multi-point positioning and speed adjustments. It is perfect for moving lightweight objects, too.

General industry Automatic inkjet printers

The VLAST is used in the parts that move the inkjet heads. The device can be constructed at a low cost.

Models used X axis: VLAST
Y axis: VLAST

General industry Oil brushing machines

The VLACT is used to drive the oil brush, and the VLAST is used for the part that moves the brush. The VLAST/VLACT were adopted for their ease of operation. In addition, food-grade grease was used for the mechanical portions so they could be used on food equipment.

Models used X axis: VLAST
Y axis: VLACT

Electronic component industry Visual inspection devices

The VLAST is used in the part that moves the camera. The cost of this device was successfully reduced by combining a linear bush with the VLAST, which itself achieves accurate positioning at a low cost.

Models used X axis: VLAST

Machine tool industry Loaders for automatic lathes

The VLAST is used in the parts that move the workpiece. Even though the VLAST is installed close enough to the machining process that cutting chips adhere to it, no foreign material will get inside thanks to its fully covered structure.

Models used X axis: VLAST
Y axis: VLAST

Series Overview

Model	Ball screw lead (mm)	Stroke (mm)	Estimated motor capacity (W)	Maximum load capacity ¹ (kg)		
				Horizontal	Wall-mounted	Vertical
VLAST45	6	50 to 500	50	11.5	11	7
	12			11.5	10.5	5.5
VLAST60	6	50 to 700	50	29.5	23	11.5
	12			12	12	5.5
	6		100	29.5	23	11.5

	12			13.5	—	6
VLACT55	6	50 to 300	100	56	—	23
	12			25	—	11.5

¹ Maximum load capacity refers to the mass at the below speed and acceleration/deceleration.

Speed: The rated rotational speed of the motor (3,000 min⁻¹).

Acceleration/deceleration: 0.15 G for a 6 mm lead, 0.3 G for a 12 mm lead.

² The maximum speed is restricted by the permissible speed of the actuator.

If "0" is selected:

No coupling will be attached to the VLAST. Please specify if a coupling is required when ordering.

* With standard specifications, the VLACT will be shipped with a coupling mounted on the body.

If "1" is selected:

The designated motor will be mounted. Please specify the motor cable direction separately. Please select the coupling, driver, and controller yourself.

This product is compatible with motors from various manufacturers. Contact THK for details.

VLAST45 and VLAST60 are not available with options "A" or "B."

		I _y (mm ⁴)	9.42 × 10 ³	
	Mass (kg/m)	1.01		
Ball screw	Ball screw lead (mm)	6	12	
	Basic dynamic load rating C _a (N)	1950	900	
	Basic static load rating C _{0a} (N)	3510	1610	
	Screw shaft diameter (mm)	φ8		
	Thread minor diameter (mm)	φ6.8		
	Ball center-to-center diameter (mm)	φ8.4		
Bearing (fixed side)	Axial direction	Basic dynamic load rating C _a (N)	1400	
		Static permissible load P _{0a} (N)	630	
	Positioning repeatability (mm)	±0.02		
	Backlash (mm)	0.1		
	Permissible input torque (N·m)	0.66	0.8	
	Static permissible moment ⁵ (N·m)	M _A : 12, M _B : 12, M _C : 24		
	Standard grease	THK AFF Grease		

¹ This is the geometric moment of inertia for the LM Guide rail.

² I_x is the geometric moment of inertia about the X axis.

³ I_y is the geometric moment of inertia about the Y axis.

⁴ The permissible rotational speed may decrease as the stroke becomes longer.

⁵ Static permissible moment is the maximum moment that can be permitted while the product is stationary.

Note 1) Please select a straight motor shaft.

Note 2) Please select the motor options (brakes, encoders, etc.) offered by each manufacturer. See each manufacturer's catalog for details about the motors.

Note 3) If the motor is changed to a type not listed above, the actuator specifications may change. Each compatible motor was selected based on the actuator specifications, so it cannot be used in excess of the actuator's rated conditions.

Note 4) If the specifications without a motor are selected, no coupling will be attached.

Note 5) When selecting a coupling yourself, please keep the coupling length less than 20 mm. When selecting a coupling 20 mm or longer, please keep the outer diameter at 18.5 mm or less.

Note 6) If the maximum torque of the installed motor will exceed the permissible input torque (p. 7), please consider a safety measure to limit the torque.

Dimensions

Direct Motor Coupling

¹ These are through holes, so do not use a depth greater than 7.5 mm.

Options

Sensors

Optional photo sensors and proximity sensors are available.

If you select the sensor option, all sensor-related components will be included with the main actuator unit. Please perform the installation yourself.

See the following precautions (Notes 1 to 3) before using.

Symbol	Details	Model No.	Accessories
0	No sensor	—	—
1	Sensor rail	—	Mounting screw, sensor rail (x1)
6	Photo sensors ¹ (x3)	EE-SX674 (OMRON Corporation)	Mounting screw/nut, sensor rail (x1), mounting plates (x3), connectors (EE-1001 x3)
7	Sensors: N.O. contact ² (x3) Sensors: N.C. contact ³ (x3)	APM-D3A1-001 (Azbil Corporation) APM-D3B1-003 (Azbil Corporation)	Mounting screw/nut, sensor rail (x1)

M	Sensors: N.O. contact ² (x1) (PNP output) N.C. contact ³ (x2) (PNP output)	GX-F12A-P (Panasonic Industrial Devices SUNX Co., Ltd.) GX-F12B-P (Panasonic Industrial Devices SUNX Co., Ltd.)	Mounting screw/nut, sensor rail (x1)

¹ The photo sensors can be switched between ON when lit and ON when unlit.

² N.O. contact: Normally open contact

³ N.C. contact: Normally closed contact

Note 1) Sensor dogs cannot be mounted to the main actuator unit, so please mount them to another object such as a workpiece or jig.

Note 2) If proximity sensors are close to one another, they may not function properly. If that happens, please prepare a type with a different frequency.

Note 3) It is possible to install sensors other than those listed above. Contact THK for details.

Photo Sensor Installation Method

Sensor dogs are not included with the sensor option. Please reference the dimensional drawing below to design a sensor dog and then install the sensor.

Proximity Sensor Installation Method

Sensor dogs are not included with the sensor option. Please reference the dimensional drawing below to design a sensor dog and then install the sensor.

Note 1) Please select a straight motor shaft.

Note 2) Please select the motor options (brakes, encoders, etc.) offered by each manufacturer. See each manufacturer's catalog for details about the motors.

Note 3) If the motor is changed to a type not listed above, the actuator specifications may change. Each recommended motor was selected based on the actuator specifications, so it cannot be used in excess of the actuator's rated conditions.

Note 4) If the specifications without a motor are selected, no coupling will be attached.

Note 5) If the maximum torque of the installed motor will exceed the permissible input torque (p. 11), please consider a safety measure to limit the torque.

Dimensions

Direct Motor Coupling

¹ These are through holes, so do not use a depth greater than 10 mm.
² This is the stroke up to the mechanical stopper.

Stroke (mm) (Stroke between mechanical stoppers)		50 (60)	100 (110)	150 (160)	200 (210)	250 (260)	300 (310)	350 (360)	400 (410)	450 (460)	500 (510)	550 (560)	600 (610)	700 (710)

³ The maximum speed is restricted by the permissible speed of the actuator.

Options

Sensors

Optional photo sensors and proximity sensors are available.

If you select the sensor option, all sensor-related components will be included with the main actuator unit. Please perform the installation yourself.

See the following precautions (Notes 1 to 3) before using.

Symbol	Details	Model No.	Accessories
0	Without	—	—
1	Sensor rail	—	Mounting screw, sensor rail (x1)
6	Photo sensors ¹ (x3)	EE-SX674 (OMRON Corporation)	Mounting screw/nut, sensor rail (x1), mounting plates (x3), connectors (EE-1001 x3)
7	Sensors: N.O. contact ² (x3)	APM-D3A1-001 (Azbil Corporation)	Mounting screw/nut, sensor rail (x1)
B	Sensors: N.C. contact ³ (x3)	APM-D3B1-003 (Azbil Corporation)	Mounting screw/nut, sensor rail (x1)
E	Sensors: N.O. contact ² (x1) N.C. contact ³ (x2)	APM-D3A1-001 (Azbil Corporation) APM-D3B1-003 (Azbil Corporation)	Mounting screw/nut, sensor rail (x1)

L	Sensors: N.C. contact ³ (x3)	GX-F12B (Panasonic Industrial Devices SUNX Co., Ltd.)	Mounting screw/nut, sensor rail (x1)
J	Sensors: N.O. contact ² (x1) N.C. contact ³ (x2)	GX-F12A (Panasonic Industrial Devices SUNX Co., Ltd.) GX-F12B (Panasonic Industrial Devices SUNX Co., Ltd.)	Mounting screw/nut, sensor rail (x1)
M	Sensors: N.O. contact ² (x1) (PNP output) N.C. contact ³ (x2) (PNP output)	GX-F12A-P (Panasonic Industrial Devices SUNX Co., Ltd.) GX-F12B-P (Panasonic Industrial Devices SUNX Co., Ltd.)	Mounting screw/nut, sensor rail (x1)

¹ The photo sensors can be switched between ON when lit and ON when unlit.

² N.O. contact: Normally open contact

³ N.C. contact: Normally closed contact

Note 1) Sensor dogs cannot be mounted to the main actuator unit, so please mount them to another object such as a workpiece or jig.

Note 2) If proximity sensors are close to one another, they may not function properly. If that happens, please prepare a type with a different frequency.

Note 3) It is possible to install sensors other than those listed above. Contact THK for details.

Photo Sensor Installation Method

Sensor dogs are not included with the sensor option. Please reference the dimensional drawing below to design a sensor dog and then install the sensor.

Proximity Sensor Installation Method

Sensor dogs are not included with the sensor option. Please reference the dimensional drawing below to design a sensor dog and then install the sensor.

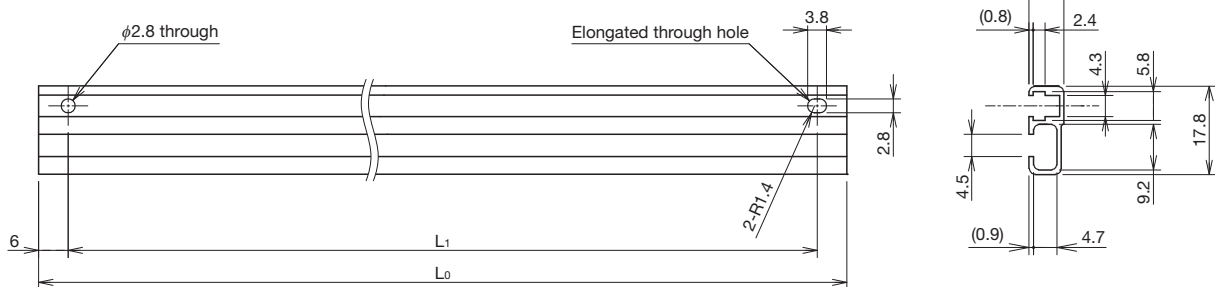

Sensor Rail (Sold Separately)

Precautions for Use

Application of These Products

- These products cannot be used for equipment or systems used in situations involving human life and limb.
- Be certain to contact THK in advance if considering utilizing for special applications, such as devices or systems used in passenger vehicles, medical equipment, aerospace, nuclear power, or electric power equipment.

Rotational Motor Drive Products

Handling

- When using the product in locations exposed to constant vibrations or in special environments such as in clean rooms, vacuums, and low/high temperatures, contact THK.
- Tilting the table or the outer rail may cause them to fall due to their own weight.

Safety Precautions

- Before operation, thoroughly read and follow "Manipulating industrial robots - Safety" (JIS B 8433) and "Ordinance on Industrial Safety and Health" (Ministry of Health, Labour and Welfare of Japan).
- Be certain to read the instruction manual carefully, ensure you fully understand its contents, and observe precautions for safety.
- When installing, adjusting, inspecting, and maintaining the actuator body and related connected devices, be sure to unplug all plugs from outlets and lock them or prepare a safety plug so that the power cannot be turned on except by the operator. In a visible location, post a notice clearly stating that work is in progress.
- Never touch the operating parts of the actuator while it is live. Also, do not enter the operating range of the actuator while the product is in operation or a ready state.
- If multiple people are involved in the operation, confirm procedures such as work process, signs, and abnormalities in advance, and appoint a separate person for monitoring the operation.
- Do not disassemble these products unnecessarily. Doing so may lead to contamination by foreign materials or deterioration in accuracy.
- Take care not to drop or strike this product. Otherwise, it may cause injury or damage the unit. Even if there is no outward indication of damage, a sudden impact could prevent the unit from functioning properly.
- Do not exceed the permissible rotation speed when using the product. This could damage the product or otherwise cause it to malfunction. Please use the product within the range of speeds we have specified.
- Take care to avoid contamination of foreign material such as debris or cutting chips. This may result in damage to the ball circulation parts or decreased functionality.
- Contact THK regarding use in environments where coolant may enter the product.
- An impact-absorbing mechanism such as a shock absorber must be installed if there is a risk that the slider may collide with the stoppers attached to both ends of the movable range. The stoppers are not intended to absorb impacts during slider collision. Colliding with the stoppers during operation may result in damage or injury.
- Operation of the actuator over the torque limit value may lead to component damage or accidents.
- Keep the torque limit setting parameters within the allowable torque limit values.
- Motor wrap types do not include a safety device to protect users if the timing belt snaps. The customer must provide a safety device.
- Among these products are those with a total body weight exceeding 20 kg. When transporting or assembling, always take safety into consideration to avoid injury or damage, and use appropriate conveying equipment.
- In applications where this product will be moved or transferred, the conditions of use may cause inertia from the motor's weight to result in damage to the motor attachment (Housing A) or other parts. Please contact THK before using in this manner.
- In applications where this product will be moved or transferred, the conditions of use may cause inertia from the motor's weight to result in damage to the motor attachments (Housing A and motor bracket) or other parts. Please contact THK before using in this manner.

Operating Environment

- Indoors, ambient temperature between 0°C to 40°C, and ambient humidity of 80% RH or less (no freezing or condensation).
- Places free from corrosive gas and flammable gas.
- Places where vibrations and impacts are not transmitted to the unit.
- Places free from electrically conductive powder (such as iron powder), dust, oil mist, moisture, salt, and organic solvents.
- Places free from direct sunlight and radiant heat.
- Places free from strong electric and magnetic fields.
- Places that are easily accessible for maintenance and cleaning.
- When using the product in locations exposed to constant vibrations or in special environments such as in vacuums or low/high temperatures, contact THK.

Actuator Mounting Surface

- Mount to a flat surface suitable for mechanical machining or with comparable precision. Some products have required degrees of flatness.
- Mount to a base with sufficient rigidity.
- VLAST45: within 0.05 mm/200 mm, VLAST60: within 0.06 mm/200 mm

Lubrication

- For effective use of the actuator's functions, lubrication is required. Insufficient lubrication may cause greater wear on moving parts, leading to premature damage.
- Do not use a mix of lubricants with different properties. Note that the included lubricant may differ depending on the product.
- Contact THK if using special lubricants.
- 100 km should be considered a guideline for greasing intervals. However, this may vary depending on the operating conditions, so THK recommends determining a greasing interval during the initial inspection.
- Regular lubricant may not be usable in special environments such as constantly vibrating locations, vacuums, high/low temperatures, or clean rooms. Contact THK in these cases.
- Contact THK if using oil lubrication.
- Thoroughly wipe off anti-rust oil and feed lubricant before using the product.

Storage

- When storing this actuator, pack it as designated by THK and store it in a horizontal position away from high or low temperatures and high humidity.
- When storing the controller, avoid high or low temperatures and high humidity.

Disposal

- The product should be treated as industrial waste and disposed of appropriately.

Other Recommended Products

Caged Ball LM Guide Actuator SKR

- Modular structure reduces the number of parts, design hours, and assembly hours
- Caged ball effect enables a long service life and long-term maintenance-free operation
- Ideal for high-precision positioning and orthogonal, multi-axis designs

LM Guide Actuator KR

- Modular structure reduces the number of parts, design hours, and assembly hours
- Can be used in various orientations, including horizontal, wall-mounted, vertical, and hanging
- Extensive lineup of 9 sizes

LM Guide Actuator with Large-Diameter Ball Screw KSF

Open cover/top cover/fully enclosed

- Large-diameter ball screw enables high-speed and high-acceleration/deceleration operations
- 3 types of cover options to choose from to suit the application
- Supports long strokes up to 1500 mm

Economy Series Electric Actuator VLAST/VLACT
