

# PERFECT RINSING AND REMOVAL OF LIGHT SOILING

## Cleaning efficiency class 2

The typical task profile of the rotating nozzles in cleaning efficiency class 2 includes rinsing tasks and the removal of light soiling, particularly the kind that frequently occurs in the food and beverage industry as well as in the chemical and pharmaceutical industry.

The Lechler products in this class are free-spinning and made from particularly high-grade materials such as stainless steel, PVDF, PEEK and PTFE. This ensures the use of a wide range of different cleaning agents.

	Max. tank diameter [m]	0	1	2	3	4	5	6	7	8	9
---	------------------------	---	---	---	---	---	---	---	---	---	---

**Operating principles**  
Free-spinning

**Flow rates at 2 bar**  
8 to 225 l/min

**Recommended operating pressures**  
2 to 3 bar

**Max. temperatures**  
50 to 200 °C

# Rotating cleaning nozzle »PicoWhirly« Series 500.234

## Series 500.234

The PicoWhirly works with rotating solid jets and is also suitable for cleaning at very high temperatures. This rotating cleaning nozzle with kolsterised slide bearing is made entirely from stainless steel and can also be used in very small spaces, thanks to its extremely compact construction.

The maximum tank diameter shown above applies for the recommended operating pressure and is indicative only. The cleaning result is also affected by the type of soiling.

Information on operation

- Operation with compressed air only for short-term usage. Operation above the recommended operating pressure has negative effects on the cleaning result and wear.

# Rotating cleaning nozzle »MicroWhirly« Series 566

## Series 566

The MicroWhirly, with effective flat fan nozzles, is licensed for contact with food. Thanks to the robust slide bearing made from PEEK, the MicroWhirly has a particularly long service life. The MicroWhirly is alternatively available with an internal or external thread and in an ATEX version, which allows it to be adapted to a wide range of uses.

# Rotating cleaning nozzles »PTFE Whirly« Series 573/583

## Series 573/583

The PTFE Whirly is of particular interest for applications in the chemical, pharmaceutical and food industries. It works with rotating solid jets and is suitable for use in corrosive environments. The slip-on connection has a 3-A certification and can be used in areas subject to particularly high hygiene requirements, such as contact with food.

	<b>Max. tank diameter [m]</b>	0	1	2	3	4	5	6	7	8	9
--	-------------------------------	---	---	---	---	---	---	---	---	---	---

**Material**  
PTFE

**Max. temperature**  
95 °C (versions for use with higher temperature (130 °C) on request)

**Recommended operating pressure**  
2 bar

**Installation**  
Operation in every direction is possible

**Filtration**  
Line strainer with a mesh size of 0.3 mm/50 mesh

**Bearing**  
Slide bearing made of PTFE

 \* See drawing 3 for details

The maximum tank diameter shown above applies for the recommended operating pressure and is indicative only. The cleaning result is also affected by the type of soiling.

### Information on operation

- Operation with compressed air only for short-term usage. Operation above the recommended operating pressure has negative effects on the cleaning result and wear.

### Slip-on information

- R-clip made of 316L SS is included (Ordering no.: R-clip 1: 095.013.17.06.60, R-clip 2: 095.013.17.06.61).
- Depending on diameter of the adapter the flow rate can increase due to leakage between connecting pipe and rotating cleaning nozzle.

# Retractable rotating cleaning nozzle »PopUp Whirly« Series 5P2/5P3

## Series 5P2/5P3

The PopUp Whirly is designed for cleaning in confined spaces and for tanks or pipelines where conventional cleaning systems could affect the process. The free-spinning rotating nozzle can be installed flush with the wall. When a certain liquid pressure is applied, the rotating cleaning nozzle of the PopUp Whirly extends automatically and starts cleaning. The PopUp Whirly is also suitable for pipe cleaning and for applications that use foam. It is particularly interesting for applications in the food and beverage industry as well as in the chemical and pharmaceutical industry. The ATEX approval makes the PopUp Whirly suitable for use in explosive areas.

With Tri-Clamp

Information on operation

- The PopUp Whirly is not suitable for operation with compressed air or any other gas.
- Operation above the recommended operating pressure has negative effects on the cleaning result and wear.

Weld-in flange for Tri-Clamp-Version

5P2

Ord.-no. 050.020.1Y.01.00

5P3

Ord.-no. 050.020.1Y.01.01

Information

Gasket with a thickness of 2 mm must be used if the PopUp Whirly is installed with this weld-in flange.

Material

316L SS

Weld-in socket for Thread-Version

5P2

Ord.-no. 050.020.1Y.AQ.00

5P3

Ord.-no. 050.020.1Y.AS.00

Information

The thread is hygienically sealed with 2 O-rings included in the scope of delivery.

Material

316L SS

Example of ordering with FDA and (EG) 1935/2004 conformity.

All Materials are suitable for contact with food.
