

Sustainable agitation

Power through steady progress

Our family-owned company VISCO JET® has been designing and producing sustainable agitator technology for over 30 years and is now being run by the second generation. Through our in-depth research and development work, we have successfully developed universal agitator technology that delivers impressive results with incredibly low energy consumption. These achievements have made us a force to be reckoned with in the market.

Our unique approach to business has helped us successfully launch one game changer after another. This also makes us an attractive employer: We can recruit a great deal of talent and secure lasting loyalty from our employees to our company.

Our track record speaks for itself:

- 🏆 Over 10 patents
- ★ Trendsetting innovations
- 🏆 Prestigious awards

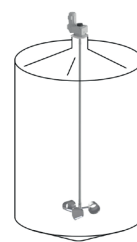

Our **laboratory and pilot agitators** are specifically designed for small-scale applications and ensure maximum flexibility for daily work in the laboratory

Our **container and drum agitators** stir media with up to 30,000 mPas in IBC containers and standard 200-litre drums for preparation or further processing.

Our **stand agitators** can stir different container sizes and geometries, different filling volumes and products safely and with maximum flexibility.

Our process-optimised **tank agitators** are designed for permanently installed storage or production tanks with a volume ranging from 10 to 1.5 million litres. They represent the ultimate in sustainability and safety.

VISCO JET® in figures

- 📍 Headquarters in Germany, one branch office in Switzerland
- 👤 50 markets around the world
- 🌐 Represented on 5 continents

Our promise

- 🔧 We apply a practical approach to our customers' processes and develop **customised solutions** for them.
- 🛡️ The VISCO JET® operational warranty provides the **highest level of investment protection** for all the solutions we deliver.
- 📁 Our **innovative team** continuously develops our solutions with ingenious ideas, expertise and enthusiasm.
- 🤝 As a **reliable business partner**, we place a focus on forging long-lasting relationships.

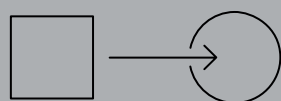

Why VISCO JET®?

In addition to innovation, quality and service are the driving force behind our customers' success:

- 🔄 **Consistent product quality** due to a gentle and homogeneous agitation process
- 📊 **Increased process efficiency** due to short stirring times and quick and easy cleaning
- 👉 **Sustainable processes** thanks to low drive power, high product quality and short process times
- 🛒 **Reduction of product costs** by eliminating residual quantities and the associated rework or waste costs
- ⚙️ **Reduction of process costs** through low energy costs and faster throughput times during the production process
