Standard Fittings

Standard fittings are composed of all those items that connect components of various kind and complete the fittings series.
The table below shows maximum recommended pressures obtained from tests carried out using safety coefficient 4.

TECHNICAL CHARACTERISTICS	
Temperature	-15 ÷ +80 °C
Max pressure	50 bar
Application fields	pneumatic circuits, low-pressure oleodynamic and hydraulic circuits, vacuum
CONSTRUCTIVE CHARACTERISTICS	
Body	nickel-plated brass, aluminium, zinc-plated steel
