MEASURING RANGES

Type

|  | $\mathbf{I} / \boldsymbol{m i n}$ | gph | gpm |
| :--- | :---: | :---: | :---: |
| DKG-2/2 | $0,5-1,7$ | $8-27$ |  |
| DKG-2/3 | $0,8-2,5$ | $13-40$ |  |
| DKG-2/4 | $1,3-4$ | $21-63$ |  |
| DKG-2/8 | $2,5-8$ | $40-127$ |  |

${ }^{(1)}$ The specified measuring-/switch ranges are valid for oils having a density of $0.9 \mathrm{~kg} / \mathrm{dm}^{3}$ and a kinematic viscosity of 30 to 600 cSt , vertical installation of the device and flow direction from bottom to top.
Other installation positions or deviation from the operating densities and operating viscosities will increase the measurement error specified in the data sheet. Excessive operating viscosities will influence or may prevent function of the device.
Upon request, special scales for deviating media, different operating conditions and installation positions (only for devices which can be installed in any position) are available.
The specified switch values are switch-off points, i.e. switch values by decreasing flow.
Other measuring- /switch ranges are available upon request.
